

## IBOAONESEATBK Modular Furniture

IBOAONESEATBK is a versatile Soft Seating system designed to create a wide variety of configurations for different spaces through the combination of straight and curved pieces. It offers a comfortable and dynamic way to define environments based on specific needs. The design is developed under an open configuration concept, allowing for unlimited customization and providing both comfort and numerous usage options.

The foundation of any I BOA combination lies in its strategic selection of two rectilinear modules, which enable various configurations. These modules provide the necessary comfort and security to create pleasant environments, adapting to different activities and spaces.

Currently, we only have the I BOA Two Seater and the I BOA One Seater in stock. Other pieces are available by special order.
