

PM9416 Series Ergonomic Office Executive Chair

The PM9416 series ergonomic office executive chair, adopts a backrest design that conforms to the human spine curve, fits the back structure, ergonomic and multifunctional.

This chair effectively disperses back pressure, helps users maintain a good sitting posture during long hours of work, reduces spinal fatigue and discomfort, and improves work concentration and efficiency. The seat cushion is filled with high-density, high-rebound foam, which is soft to the touch and has strong support.

It is not easy to collapse after long-term use, ensuring that users can maintain a comfortable sitting feeling throughout the day.

At the same time, the office chair adopts a simple and modern appearance design, which is suitable for various office environments and creates a professional and comfortable office atmosphere. BIFMA and Ansi certified.
