SM03HGY: Mesh Ergonomic and Multi-Functional Chair

• All mesh ergonomic and multifunctional chair

By looking at simple designs that deliver the most ergonomic features.

• SM03H Mesh chair started with the notion of that the mesh fabric upholstery material could be stretched in a way that supplies the greatest strength at points where support is needed and allow for the most expansive range of motion.

• The back is designed like a human's, the suspension bridge is the support of the chair-back, contributing to flexible frame.

• Once the chair is tuned to fit you, the backrest adapts to your movement, adjusting automatically to your shifting positions. In other words, a custom, personalized chair with automatic ergonomics.

• You can spend hundreds of dollars more for a mesh office chair with fewer features, but why? We have your wallet too!

• High back, adjustable chair headrest supplies excellent neck and head support.

• Adjustable 3D lumbar support allows you to adjust to your comfort zone.

• Italy " Donati" weight sensitive mechanism uses the laws of physics to harness a person's body weight to automatically supply the correct amount of recline.

• Gas lifter cylinder for height adjustment.

Frame and 5-star grey white nylon base with castors.

• Breathable: Black or grey mesh fabric upholstery.

The mesh is breathable, preventing heat build-up, keeping you cool, comfortable, and productive.

• The mesh backrest is comfortable and automatically molds to your body following your contours while supplying excellent neck and head support.

• Dimensions: 26.77 wide X 25" deep X overall height 44.30" high with headrest.

• Available in dark grey mesh.
