

PMTL3WAF20 - Aluminum Tripod Table Base

Economically designed for use with any outdoor patio or deck seating setup, this Aluminum Tripod Table Base and Four Ways Leg are a great solution for any indoor café, bar, restaurant, or home dining application.

With a 27" tall height (perfect for dining), this low profile and lightweight base shines bright with its lightly brushed finish giving it a sophisticated high-quality feel. Even if you have an uneven floor surface, this base comes with heavy duty plastic glide feet that allow for 1/4" of leveling capability. Please note that this base is not intended for use with heavy or overweight solid table tops like marble or granite.
