

Wood Veneer Table Tops - An Economical Alternative

- Wood Veneer table tops are an economical alternative to solid wood
- Made from a thin sheet of wood to maintain the wood look and touch, then bonded to the table core.
- To achieve the plywood edge, the veneer is combined with a plywood core that is left exposed to create the edge, finished with a polish.
- Wood veneer is a cost effective solution with added plywood edge for a contemporary, wood-focused design.
- Indoor use only
- Color: Two tones cherry and grey
